DOCTOR LIFE®
THE LEADING PNEUMATIC MEDICAL TECHNOLOGY SINCE 1986

PHYSIO
Swelling of the subcutaneous tissues caused by obstruction of the lymphatic drainage. It results from fluid accumulation and may arise from surgery, radiation or the presence of a tumor in the area of the lymph nodes.

**Lymphedema**

DVT is the formation of blood clot in a deep vein. DVT and PE (Pulmonary Embolism) can arise mainly from knee or pelvis operation, the internal / neurological operations and others. DVT-2600 can be used individually or combined with anti-coagulant or compression stocking for the prevention of DVT.

**DVT (Deep Vein Thrombosis)**

**IPC (Intermittent Pneumatic Compression) system**

- **Pre-therapy and Gradient Compression for effective lymphatic drainage.**
- **LCD display with touch key control**
- **Easy to clean wipe down design.**
- **Self detection**
- **Various specialized sleeves for lymphedema patients.**

**Lymphaha-Flow (LF400)**

Specialized lymph edema therapy

Lymphahaflow, LF400 is designed specifically for the effective drainage of the Lymphatic System. It features three treatment modes that are Pre-Therapy, Straight Sequential Mode, and Peristaltic (Massage/Circulation) mode. Pre-therapy mode prepares the lymph system for drainage by clearing the lymph nodes. Straight Sequential mode with gradient gently and effectively moves excess fluid proximally towards the body. Peristaltic mode stimulates active blood flow to the limb.

These three modes make sure LF400 delivers optimized lymphatic drainage in body.
- **Pre-treatment and Gradient Compression for effective lymphatic drainage.**
- **LCD display with touch key control**
- **Easy to clean wipe down design.**
- **Self detection**
- **Various specialized sleeves for lymphedema patients.**
LX9 is a semi-professional compression model with a compact design and effective therapy programs including four compression modes. The device provides automatic operation with an easy START/STOP button or you can select more tailored programs manually, including selecting particular chambers to be inflated.

MK400L
Specialized professional (6 chambers)

The MK400L is a professional compression model that includes specialized functions in physio and rehab and sports market. This includes three compression modes and a reverse function which sends blood to the distal part of the body assisting arterial circulation for each mode. The device is set via the touch key pad which provides simple indicators.

MK300L
2 channel professional (6 chambers)

The MK300L is a professional model with individual 2 channels for two person use or maximum four (4) sleeves use at the same time. This includes three compression modes: a wave mode, a squeezing mode and a combination including reverse compression which sends blood to the distal part of the body assisting arterial circulation. The device is set via the touch key pad which provides simple indicators.

DL1200H
High class (12 chambers)

DL1200H has various sleeves as full body, leg and arm for effective drainage and minute treatment by 12 chambers. The full body sleeve can be combined with infrared heating system as 2 in 1 therapy. The solid case and stable inner parts are very quiet while running. Users can set customized protocol with 8 compression modes, pressure, time, hold, and interval functions according to a client’s condition.

IPC
Professional & Semi professional

Full Body Sleeve: IR heating pad is inside
LX7max is the most useful IPC system that goes together with various different sleeves such as leg, arm, waist, and center body selves in the markets which range from home care to semi-professional use in hospitals and beauty salons. Two innovative functions are included; circulation mode and massage mode.

ANYCARE series are our latest home care products with newly upgraded features and refreshed feeling of compression. The design image came from luxury bag especially for women use. It's portable, so it’s convenient use while moving one place to another. ANYCARE Premium is upgraded version with functions which pressure range can be adjustable in every 4 air chamber.

DL2003V3 is one of the most popular model that has been popular in the longest period for DOCTOR LIFE history. This model represents our classic pneumatic system that provides relaxation and support blood circulation. The family-friendly design is for home use, so it can be used in the most places.

DOCTOR LIFE sleeves provide various selections such as full body, center body, leg, arm & shoulder, waist sleeve in size and design. The sleeve can be selectable according to intended use from various sleeve selections.
ICEwrap
For acute & chronic pain

ICEwrap Cooling is effective at providing pain relief and reducing acute swelling at joint by reducing inflammation in soft tissue including muscles, tendons and ligaments.

ICEwrap RF is a non-invasive intracranial deep layer RF using the technique of resistive electric transfer (RET) for intratumoral and cerebral thermometry results.

ICEwrap Cooling and RF heating can be used for a wide range of conditions according to a medical professional’s advice including acute and chronic pain, swelling or inflammation.

ICE WRAP cooling and RF heating can be used for a wide range of conditions requiring pain relief.

Cryo therapy
- Acute pain relief, joint swelling, soft tissue inflammation
  *Cooling: -5~ -20°C

Deep layer RF therapy
- Non-invasive chronic pain, connective tissue issues, relief of dystonic spasm, lymphatic drainage
  *Power: 600W
  *Frequency: 0.5MHz

Combination therapy
- Broad pain relief therapy as indicated by a medical professional for acute or chronic pain, swelling, inflammation, musculoskeletal disorders and/or connective tissue disorders
  *Cooling: Max. -20°C
  *Heating: about 42~49°C

RF
- Cooling

User interface
- Heating Plate
- Cooling Plate
- Skin tightening

L handle
- Large areas of body (ex. back, abdomen, thigh, hip.)

S handle
- Small areas of body (ex. thigh, shoulder, arm.)

F handle
- Joint areas of body
Reliver improves functional range of motion in the hand for a variety of neurological and post-surgical conditions. Increasing range of motion can be addressed at the wrist and finger joints through repeated passive range.

- 4 exercise modes (finger, wrist, finger relax, finger and wrist)
- Adjustment of degree settings according to patient’s condition
- Applied to right or left hands
- Adjustable to hand size
- Easily and safely used in the home
- Auto checking available for patient’s condition
- Monitors patient’s applied resistance for safe use

Reliver (RL500) Pneumatic hand rehabilitation system

If you use unfixed gel pack before, you can conveniently use DOCTOR LIFE’s Cryo-Thermo Band that is able to use with air compression system for more effective treatment of pain and lymphedema than unfixed gel pack in home as well as hospital.

Features
- No leakage because of special gel and outside fabric packaging. (Semi-permanent-use)
- Cryo and Thermo therapies are available because the use temperature is within -15°C to 60°C.
- Wearing sensation is good because the fabric material quickly absorbs surface moisture from condensation.
- The Cryo-Thermo therapy is more effective with strong Velcro band on pain portions of body.

Cryo-Thermo band

Besides, using DOCTOR LIFE’s Cryo-Thermo Band with IPC system help to prevent pain and swelling on the swollen joint to heal. Also, DOCTOR LIFE’s Cryo-Thermo Band is able to be used in medical facilities as well as in home. If you need other Cryo-Thermo Band, please contact us.
